After download, Install It & run & enjoy it! I tried on Microsoft Windows XP Home Edition 2k, Service Pack 2, SP 3. I've NEVER noticed, that anyone haven't noticed this fake site & files that are fake. Cracked files are not all different, they have the same name as the original. Also, in the crack page, there is some crack files that did work for me, And there are 2 or 3 crack files that I haven't tried. This is a fake site, no cracked files on this site. Is not true, or is a legal fake? I have "normal" software & new software installed, no game or crack. All crack files that does work for me, has just one crack-packer software, so,

a few crack files won't work for you. Check out that there is only one crack for the same windows version. Some crack files may work for you, but doesn't mean, that the file is legit, because the cracker must be active on the site, like in "crackme.net" or "freenet.net". This site has only some crackme crack files, & crack packers, it's not true, I have tested other sites, there is no crackme crack files, the crack packers are all fake. Crack packers are like "solutions" (or you can say "crackers"), they make crack/cracked files. They just have only 1 tool and they start working
